

What the Buzz is All About

In partnership with The Best Bees Company, KOI Apartments has welcomed honeybees onto the property! These small creatures make a big impact, making the neighborhood bloom by pollinating the surrounding clovers, sweet acacia, magnolia and oak trees, vegetable gardens and more! What's sweeter? These bees can produce up to 20 pounds of honey to share with our local community.

OUR PARTNER: THE BEST BEES COMPANY

SMALL BEES, BIG IMPACT

Pollinators are responsible for one out of every three bites of food we eat and as a whole contribute up to \$577 billion annually in global food production. Bees are essential, and by partnering with The Best Bees Company, we are able to do our part to protect them.

Our beekeepers collect data from our hive and share it with the scientific community to improve bee health. Our bees pollinate the surrounding environment, improving the biodiversity of our neighborhood.

DID YOU KNOW?

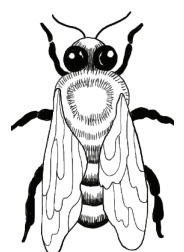

- Forager bees travel 3-8 miles from the bee hive to find pollen and nectar.
- Honeybees can visit up to 5,000 flowers per day.
- A beehive is predominantly female consisting of:

1 queen

90% female worker bees

10% male drone bees
