Keep Your Dogs and Cats Safe From Holiday Hazards

Happy holidays? Not if your pet gets sick. The Food and Drug Administration's Center for Veterinary Medicine discusses some unhealthy holiday temptations and how to keep your pets safe.

Stocking Stuffers and Pet Treats

If your dog received a stocking full of pet treats, make sure he doesn't gobble them all up at once, making them hard to digest. Unchewed pet treats can get stuck in the trachea (windpipe) or gastrointestinal tract (esophagus, stomach, and intestines).

If your dog is in obvious distress from eating too much too fast, call your veterinarian immediately. Some telltale signs are drooling, choking, or vomiting.

Take note of timing. If a bone or chew toy lodges in your dog's stomach or intestines, the symptoms might not be immediate. Hours to days later, he may vomit and have diarrhea, be less active, not want to eat, and have stomach pain. If the blockage stays there too long, your dog may become very ill.

When in doubt, call your veterinarian, who may need to take x-rays, use an endoscope (a medical device with a special camera that can see inside the throat, stomach, and intestines), or even do abdominal surgery to see what and where the problem is and remove any pieces of bone or chew toy that are causing the blockage.

Tinsel and Ribbons

Decorating your tree? Wrapping or unwrapping gifts? Keep a close eye on where you leave leftover tinsel, string, and ribbons.

Your cat or dog may find these decorations irresistible because they look like easy-to-catch, sparkly, and wiggly prey. In fact, they can cause serious stomach and intestinal damage.

Play it safe by keeping tinsel off the tree and collecting all ribbons and string after gifts are opened.

Holiday Plants

If you have holiday plants such as poinsettias, mistletoe, or holly around, take care. When you display (or dispose of) these plants, your cat or dog may decide they're good to eat.

Take poinsettias, which can irritate your pet's mouth and stomach and may cause drooling, vomiting, and diarrhea. If your pet eats poinsettia leaves, you can help by picking up the food and water dishes for a couple of hours to let your pet's stomach settle.

Fortunately, severe mistletoe toxicity is uncommon and usually occurs only if your pet eats a large amount. Symptoms include vomiting and diarrhea, difficulty breathing, slowed heart rate, low blood pressure, and odd behavior.

Even though holly berries and leaves aren't very harmful, they can still make your pet ill and you should prevent your pets from eating them. In both dogs and cats, the plant's toxins can cause drooling, vomiting, diarrhea, loss of appetite, and decreased activity. Not to mention, the spikey leaves could hurt your pet's mouth.
