WELCOME TO OUR COMMUNITY!

The purpose of this resident manual is to provide you with the tools, information and resources to help you create and maintain a green and healthy home, community, and lifestyle.

THIS MANUAL

- Provides guidance on maintaining and operating your home
- Offers tips and suggestions for creating and maintaining a healthy and green lifestyle
- Outlines building policies and procedures
- Provides maps of the building and nearby amenities, including public transportation access and bike trails
- And much more!

Please refer to your lease agreement for specifics on building policies and regulations. If you have any questions, please do not hesitate to ask your Community Manager.

If you have questions about the project's ADA and Fair Housing features, please contact the on-site property manager or National CORE's Section 504 Coordinator.

Thank you and welcome home!

Regional Manager
National Community Renaissance

WHAT TO EXPECT FROM YOUR HOME

Day Creek Senior Villas is an LEED for Homes-certified project.

LEED for Homes is an international green building standard that helps to guide design and construction teams to build sustainable and enduring buildings. The program was developed by the U.S. Green Building Council (USGBC) to provide a clear, effective framework for all kinds of buildings: multi-family buildings as well as single-family buildings.

National Community Renaissance is one of 20 developers nationally and the only affordable housing developer recognized by USGBC as a “Power Builder”. We are committed to LEED for Homes and building more projects that minimize the impact on the environment while providing high-quality housing for our residents.

Because there are many ways to build green, LEED for Homes provides developers with guidelines to ensure the homes built are healthy and sustainable for their tenants. To achieve LEED for Homes Certification, a project needs to earn points in eight categories:

1. Integrative Design
2. Location and Linkages
3. Sustainable sites
4. Water Efficiency
5. Operating Energy
6. Materials and Resources
7. Indoor Environmental Quality
8. Operations, Maintenance, and Resident Engagement

To learn more about the LEED for Homes rating system, please visit <https://www.usgbc.org/leed/rating-systems/residential>

The LEED for Homes scoring sheets are at the end of this document.

WHAT A “GREEN” HOME MEANS TO YOU

While your new home may look just like what you have seen in other places you've lived, it is designed with high standards and the intent to reduce environmental impact and improve human health.

You are living in a home that is comfortable, energy-efficient, affordable to maintain, and long-lasting. Your home:

Social Equality

- Improves your health and wellbeing
- Improves air quality and reduce toxins
- Increases access to basic amenities and alternate transportation
- Enhances comfort and control in the home

Economic

- Reduces the cost to operate the building
- Lowers utility bills
- Increases occupancy of the homes
- Improves performance and durability of the equipment

Environmental

- Protects nature, wildlife and its diversity
- Provides better air and water quality
- Conserves natural resources

This guide will help to explain the special features in your home that will protect your health and well-being while also giving you actionable tips and information to live a green, healthy, and thriving lifestyle.

BUILDING FEATURES

Low- or non-toxic volatile organic compounds (VOCs) in all paints, coatings, sealants, adhesives, and flooring

- This means cleaner air for you! It is proven that these materials help reduce health problems associated with asthma and other chronic issues.

Plumbing fixtures that use less water than traditional fixtures

- These fixtures will reduce water consumption and help our state and country through drought struggles.

Lighting and heating equipment that **improves comfort and controllability**

- You will be thankful for easy-to-use and efficient fixtures and equipment that will improve your comfort at home and reduce harmful emissions.

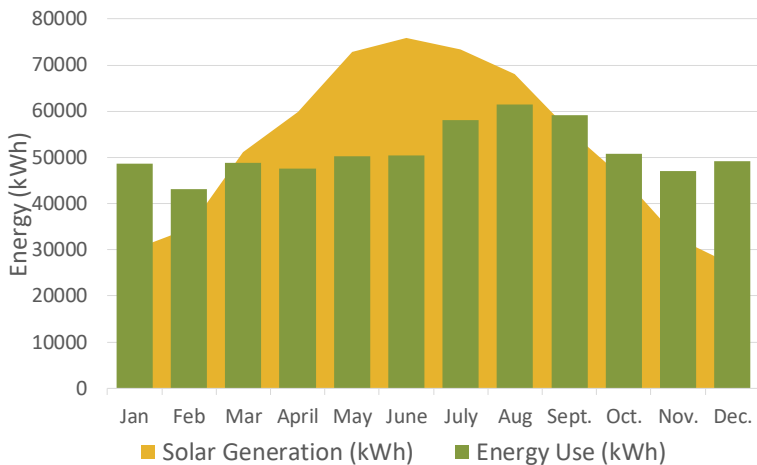

Designed for resiliency to help withstand any unexpected weather events.

ZERO NET ENERGY*

Day Creek Senior Villas is National CORE's very first Zero Net Energy (ZNE) project for electrical usage. (At this project, Water heating is fueled by natural gas.) It is equipped with a 410kW DC photovoltaic energy system, which uses the power of the sun to generate electricity. We anticipate that, averaged over the course of the year, all of the project's electricity will be provided from this renewable energy system. This is achieved by building a very energy-efficient building, using energy-efficient appliances, and generating solar power economically. Less utility-provided electricity means greater operational savings, which allows the property to use operational savings to enhance operations and provide additional resident services.

Solar PV System Rating

Power Rating: 410,000 W-DC

Power Rating: ? W-AC-CEC

Annual Power Generation: 626,469 kWh

Energy Consumption Mix

Total Annual Energy Usage: 614,876 kWh

Generation-to-Usage Ratio: 102%

HEALTHY

LIVING

LIFESTYLE LIVE GREENER

There is a strong connection between your personal lifestyle choices and the health of the environment. In taking care of your health, you are also taking care of the earth (and vice versa).

LIVE GREENER

1. Buy Local

Buying local reduces the emissions required to get goods to consumers while supporting the local economy and providing you with fresher, healthier foods and products.

2. Use Green Cleaning Products

Choose non-toxic, zero VOC, biodegradable products in recycled packaging or use homemade substitutes when possible. This is better for your family's health, your wallet, and the environment.

3. Stay Active

Use the stairs, ride your bike, or go for a walk. Staying active greatly decreases the risk for chronic disease, obesity, and health disparities. It also keeps you living longer and decreases your cost of healthcare.

4. Use Public Transportation

Public Transportation cuts down on your environmental footprint, and so does carpooling! Find out more information on the public transportation in your area in this guide.

DID YOU KNOW?

The **more connections** we have to the people and places around our home, the healthier and happier we are and the longer we live. – Robert Putman, Harvard University Professor

LIFESTYLE STAYING ACTIVE

This building has been designed with your fitness and health in mind. Several amenities are provided to ensure you can be active.

- **Fitness Area** The fitness area is located near the middle of the eastern portion on the first floor, and it contains appropriate exercise equipment.
- **Bike Storage** Indoor bike racks are located next to the community room and main entrance. There are a few outdoor racks as well. For assistance, please contact the Management.
- **Activity Space** On site there is a community room on the first floor of the southern portion by the main entrance and the leasing office. There is also a multi-purpose room on the second floor above the main entrance. These areas are intended to encourage residents to connect and be active. Please consult with your manager regarding the activity schedule and hours of operations.

COMMUNITY SERVICES

Nearest Urgent Care

Sierra Urgent Care @ Rancho San Antonio Medical Plaza
7777 Milliken Ave, R. Cucamonga, 91730
909.948.8100
M-F: 9am-8pm, Sat-Sun: 9am-5pm

Pharmacy Services

CVS Pharmacy @ Day Creek Marketplace
7170 Day Creek Blvd, R. Cucamonga, 91739
909.463.7846
Pharmacy: M-F: 8am-8pm, Sat: 9-6, Sun: 10-6

Nearest Hospital with Emergency Room

San Antonio Community Hospital (SACH)
999 San Bernardino Rd, Upland, 91786
909.985.2811 <https://www.sarh.org>

Nearest Library

Paul A. Biane Public Library @ Victoria Gardens Cultural Center
12505 Cultural Center Dr, R. Ccmg., 91739
909.477.2720

On-Site Activities

On-site activities will be determined in consultation with residents and service providers. Please contact the Management or consult public postings for more information.

COMMUNITY CONNECTION TRANSPORTATION

- Ridesharing/
Carpooling**

- Access /
Paratransit**
- <https://omnitrans.org/getting-around/transit-services/access-ada-services/>
 - Please complete your application on the above website early so you can utilize Omnitrans Access when needed
- Special
Transportation
Services**
- Omnitrans currently has a special program to serve seniors' transportation needs through its Special Transportation Services (STS) program. Please visit <https://omnitrans.org/getting-around/transit-services/special-transportation-services/> or call 909.379.7341 for more information.

COMMUNITY CONNECTION TRANSPORTATION

Bus service is provided by Omnitrans. Currently some bus services are suspended and others are on reduced schedule. Route 67, which runs along Baseline Rd., is currently suspended. It may resume regular schedule in January 2021.

You can use Omnitrans's Trip Planner to find options:

<https://omnitrans.org/getting-around/plan-a-trip/>

Or use the mapping function on your smartphone.

Please also contact Omnitrans for its ADA/Access and Special Transportation Services (STS) which are available for seniors at greatly reduced or no cost. Information is on the previous page.

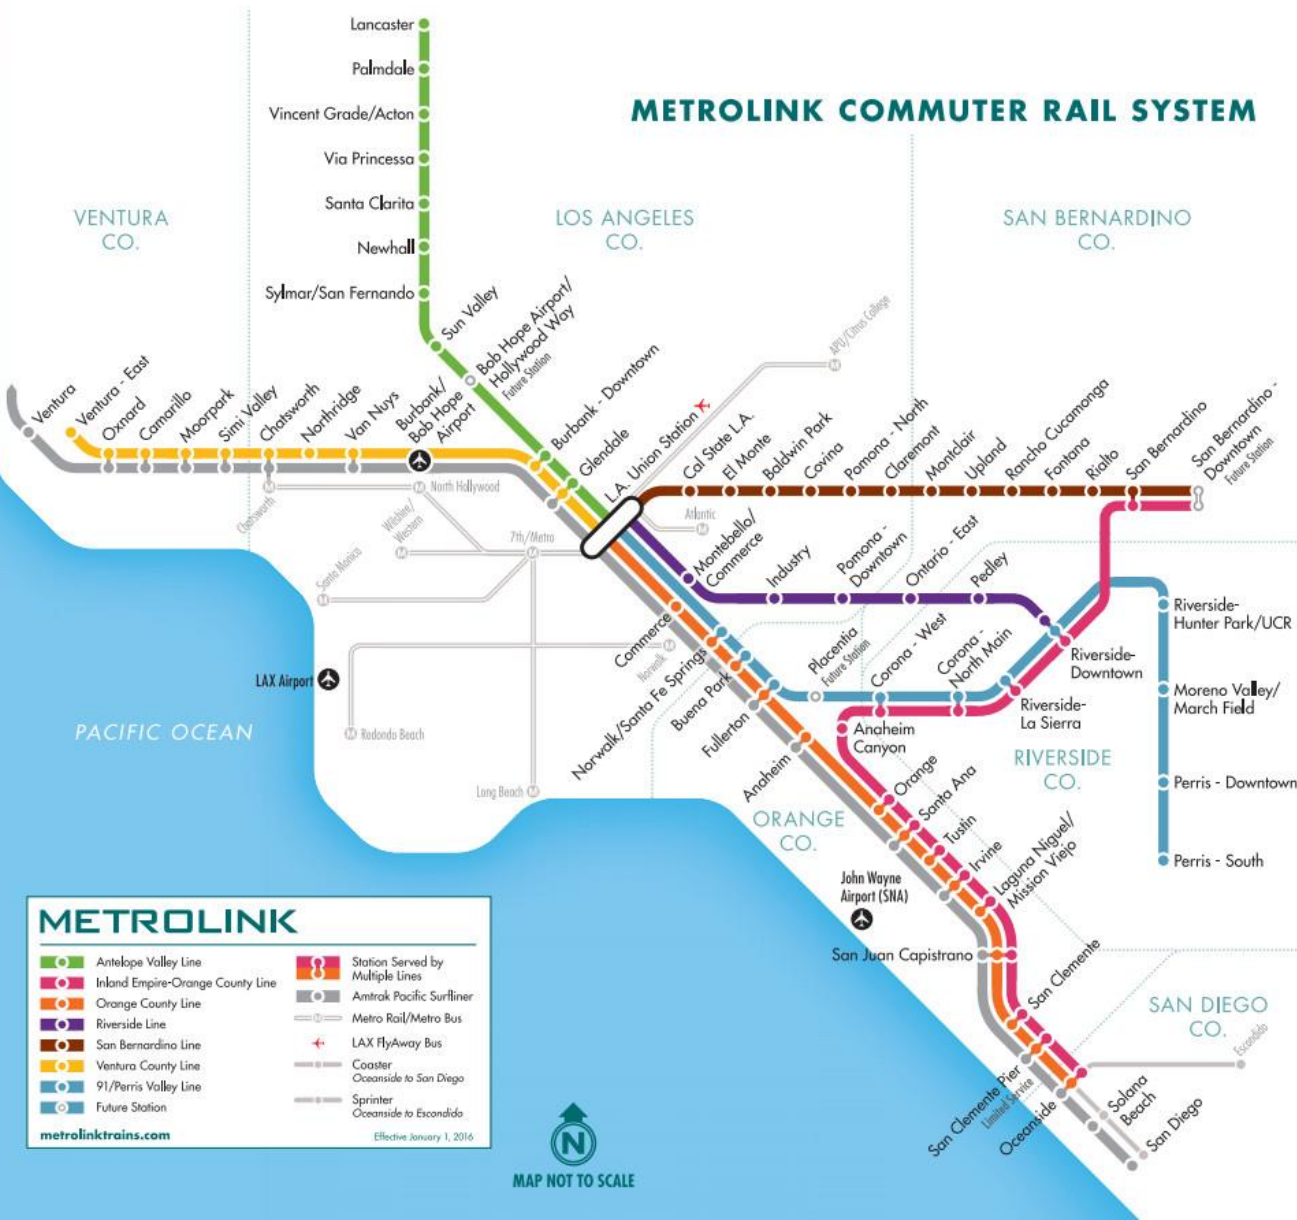

COMMUNITY CONNECTION

METROLINK COMMUTER RAIL

Metrolink Rancho Cucamonga Station is just 3.8 miles south/southwest of the project at 11208 Azusa Ct, Rancho Cucamonga, 91730. You may use Omnitrans's Access or Special Transportation Services (STS) to get to the Metrolink station.

Metrolink information: <https://metrolinktrains.com/>

Seniors 65 years or over get 50% discount on train fares and 25% off on passes

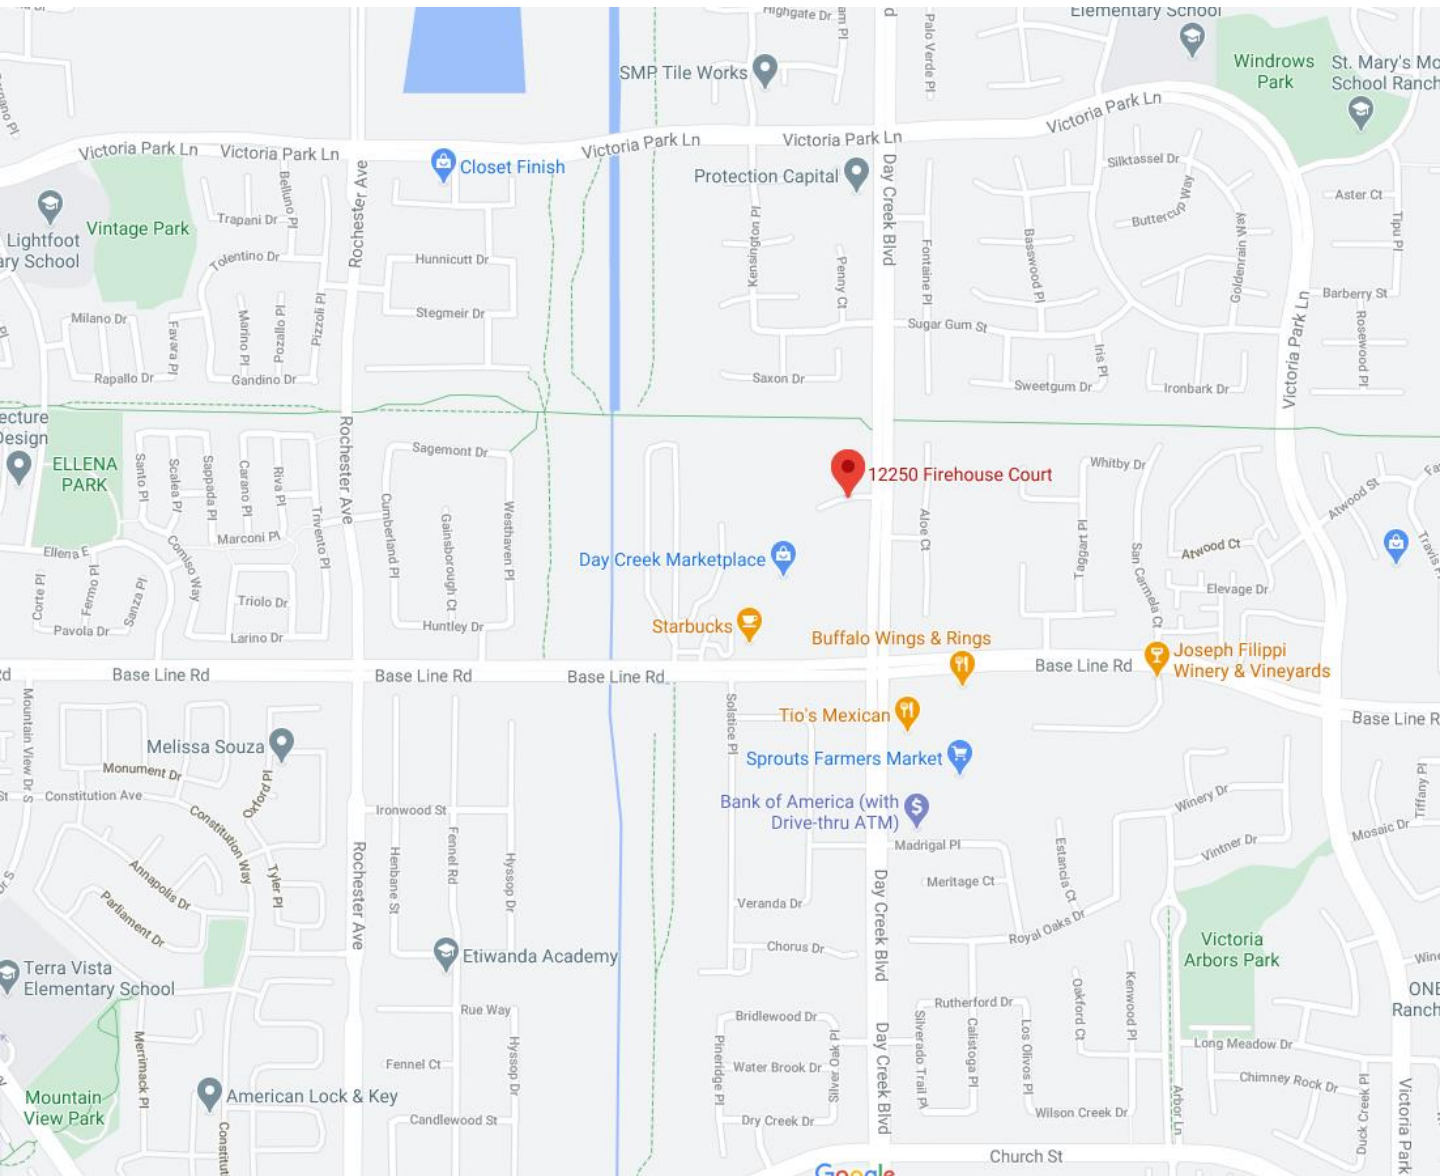

COMMUNITY CONNECTION PARKS AND PLAYGROUNDS

Vintage Park – east of Lightfoot Elementary School, entrance on Victoria Park Ln.

Ellena Park – 7139 Kenyon Way, Rancho Cucamonga, 91701

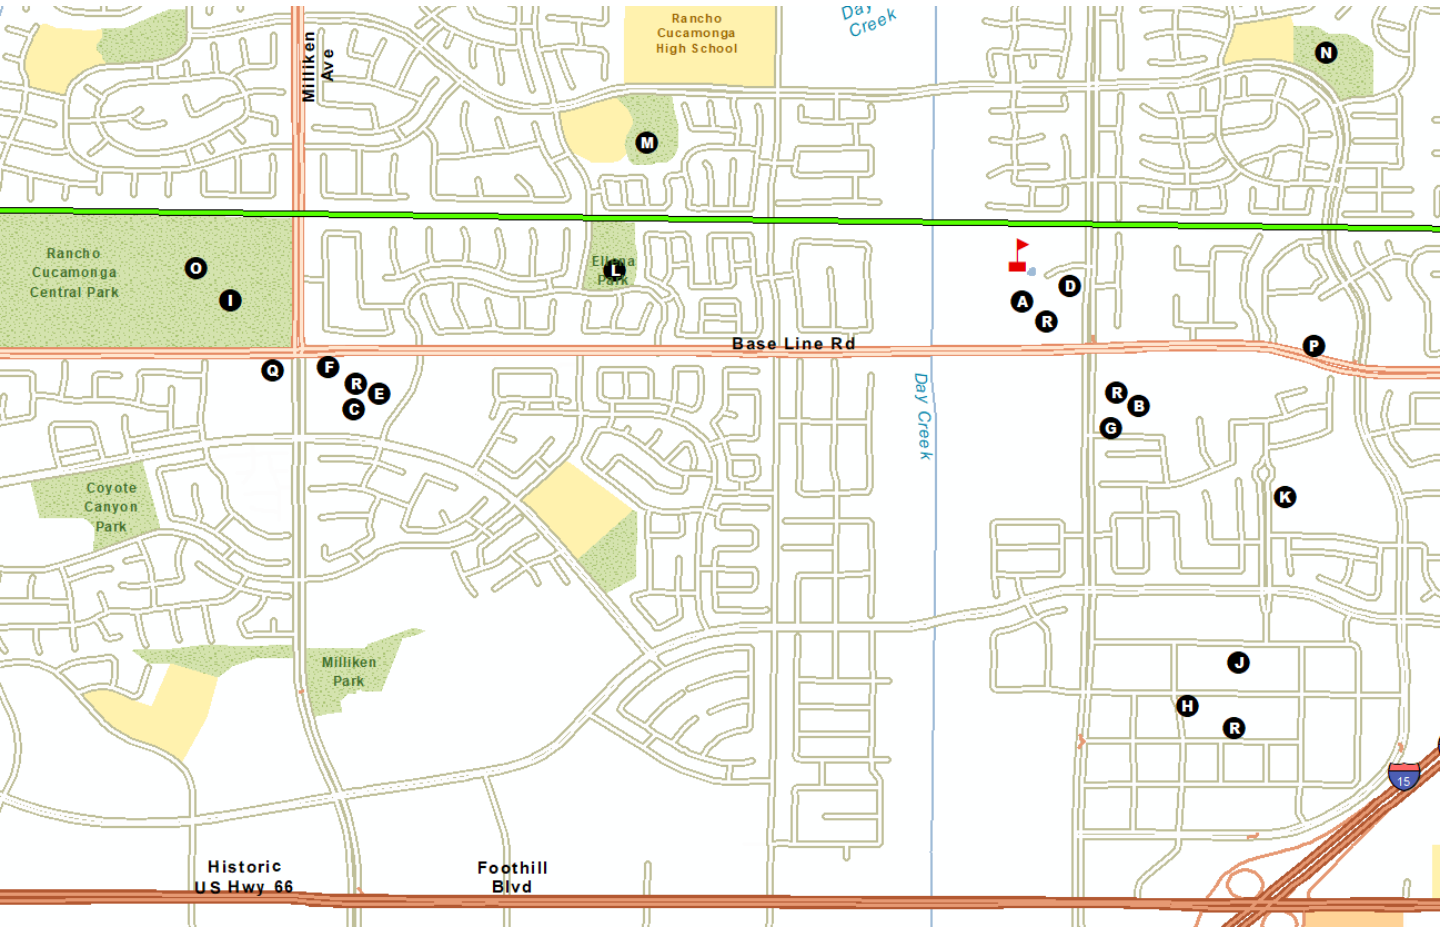

Windorws Park - 6849 Victoria Park Ln, Rancho Cucamonga, 91739

BREATHE EASY

AVOID ASTHMA AND ALLERGY TRIGGERS

Help keep your home clear of these common asthma and allergy triggers.

1 PESTS

3 MOLD & MOISTURE

2 TOBACCO SMOKE

4 DUST MITES

- Report Issues** Report problems to management as soon as possible. Please call 909.646.4544
- Good Housekeeping** Be sure to clean up food waste daily, avoid collecting boxes/papers/magazines, check cupboards and corners for pests and mold, and maintain a regular cleaning routine.
- Treat Pets** Have pets treated for fleas and other pests yearly.
- No Pesticide Foggers** Avoid using foggers as they are often ineffective and contain products that are harmful to your health.
- Report Leaks** Report plumbing/roof/toilet leaks to management as soon as possible. A small leak can turn into a big problem quickly.
- Exhaust Fans** Use the exhaust fans in your kitchen and bathroom to avoid mold and moisture damage. Clean regularly to avoid buildup of dust.
- Smoking** No smoking within the building or on site. Smoke at least 25 feet away from the building.

If you or a family member is experiencing persistent **hives, rash, or breathing issues**, contact your health care provider.

SMOKE-FREE SMOKING POLICY & SUPPORT

Day Creek Senior Villas is a smoke-free property

Why is Smoke-Free Housing Good?

- Smoking is the #1 cause of lung cancer and shortening of lives
- Smoking is the #1 cause of severe earaches and asthma in children
- Secondhand smoke is the third leading cause of preventable death
- Secondhand smoke can cause Sudden Infant Death Syndrome (SIDS) in babies
- Limiting exposure to smoke improves your chances of avoiding heart disease and other problems
- Smoking poses a fire hazard and damages interior finishes

Resident Role

- To be respectful to others and ensure the health and wellbeing of all residents, please do not smoke within the property or in front of the building (maintain at least 25' from site entrances if you choose to smoke)
- To keep our neighborhood clean and safe, please use an ashtray and throw away butts properly

If you want to quit smoking, California Smokers' Helpline offers help. Please contact 800-NO-BUTTS for more information.

ABOUT

YOUR HOME

ENERGY COMFORT & EFFICIENCY

Reducing your energy consumption provides the greatest opportunity to positively affect the environment. This is because the energy produced by power plants to fuel the building results in major greenhouse gas emissions – impacting air quality, wildlife, and climate. Also, **saving energy saves money!**

LIGHTING, DAYLIGHT AND VIEWS

- Efficient light fixtures have been installed throughout the building
- Access to daylight and views to enhance personal wellbeing and cut down on the need for electric lighting.

ADDED COMFORT

- The walls, floors and roof all have increased insulation and improved air sealing to prevent drafts, leaks, and cold surfaces.
- The windows are double-paned in order to help moderate the inside temperature.

ENERGY STAR APPLIANCES

- We provided appliances that are Energy Star-rated to minimize energy and water use. See the next page for usage tips.

DID YOU KNOW?

Buildings consume approx. **39% of the energy** and **74% of the electricity** produced in the U.S. – USGBC LEED Reference Guide v4

Better building energy performance means less greenhouse gas emissions. That means **cleaner air** and **healthier people**.

ENERGY STAR TIPS WASHING MACHINE

- **Always use HE (high efficiency detergent).** Regular detergent makes too many suds which affects performance of the machine. Look for the blue  when purchasing.
- **Fill it up.** It takes the same amount of energy to wash regardless of the size so run full loads when possible.
- **Wash with cold water.** Heating water uses 90% of the energy it takes to run a load. Cold water will do just as good a job cleaning clothes. Clothes will last longer too!
- **Avoid the sanitary cycle.** This super-hot cycle uses lots more energy and wears out the clothing.
- **Leave the door open after use.** Leave the washer's and dryer's doors open after use to allow the moisture to evaporate and help avoid mold.

DID YOU KNOW?

Washing in cold water cleans just as well as warm or hot water and prolongs the life of your clothes. - The Smithsonian, "The Case for Washing in Cold"

ENERGY STAR TIPS CLOTHES DRYER

- **Hang dry.** Air drying saves energy and prolongs the life of your garments. Please check with the Community Manager to see what is allowed at this property.
- **Use the moisture sensor option.** Many new clothes dryers come designed with a moisture sensor that will automatically shut off the machine when clothes are dry. This saves energy and lengthens the life of your clothes.
- **Clean the lint filter.** Cleaning the lint filter before and after every load will improve air circulation and increase efficiency. It is also an important safety measure in reducing fire hazards.

ENERGY STAR TIPS

REFRIGERATOR

- **Set at the appropriate temperature.** Keep your refrigerator at 35 – 38 degrees Fahrenheit.
- **Allow air to circulate behind the fridge.** Leave a few inches between the wall and the refrigerator.
- **Check the door seals.** Make sure the refrigerator seals around the door are airtight. If not sealing tightly, contact management.

DISHWASHER

- **Scrape, don't rinse.** Rinsing dishes can use up to 20 gallons of water before dishes are even loaded. Your Energy Star dishwasher and HE detergent are designed to do the cleaning so you don't have to.
- **Load it up.** Dishwashers use about the same amount of energy regardless of load size, so run full loads whenever possible.
- **Skip the heat.** Select the no-heat drying option. It provides good drying results with less energy.

ENERGY

ENERGY CONSERVATION TIPS

Lights contribute a significant percentage of electricity use in your home. Replacing incandescent bulbs with high-efficiency CFLs or LEDs reduces electricity use and saves up to \$45/month. If done in every household in the U.S. it would reduce greenhouse emissions equivalent to taking 10 million cars off the road.

USE CFL OR LED LIGHT BULBS

Use high-efficiency bulbs and reduce energy use by up to 80%

TURN OFF/UNPLUG APPLIANCES

Unplug when not in use. For example, TV, DVR, fans and coffee maker.

TURN LIGHTS OFF

Turn the lights out when you leave a room and use natural light over electric lights when possible.

KEEP REFRIGERATOR CLOSED

Think about what you need prior to opening the fridge to minimize time spent with the door open.

USE POWER STRIPS

It's easier to turn off/unplug all appliances at the same time and remove "phantom/vampire" energy loads.

UNPLUG CELLPHONE/LAPTOP CHARGERS

These use energy even when the electronic is not being charged. This is called a "vampire" or "phantom" load.

ENERGY HEATING SYSTEM GUIDELINES

Your unit's heating system has been designed to reduce the impact on the environment, save energy, and be comfortable. Your heating unit will provide both heating and cooling when you need it. Keep your windows closed when you are using your heater or your air conditioner.

One of the best ways to stay comfortable in your home and use less energy is to use your thermostat's programmable settings. In the winter, you can program it to automatically **turn up the heat while you get ready in the morning, turn it down while you're away, turn it back up in the evening, and turn it down when you go to sleep.** This is a great energy-saving feature. If your thermostat needs resetting or readjusting, please contact management. Rather than disabling the programming feature, ask for help.

Do not try to use the thermostat as an accelerator to ramp up heat quickly as this causes unnecessary demand on the equipment and wastes a lot of energy.

NEVER use your oven to heat your home and try to eliminate the use of space heaters. These can release carbon monoxide (a deadly toxin), pose a fire hazard, and are expensive to run. If you are uncomfortable in your home, please contact management.

The heating and cooling system in your apartment is very high efficiency, which will help keep your utility bills low, but it also has a lower velocity fan. You may not feel a lot of air coming through your wall registers, but the system is working. It is actually more energy efficient to leave your system running all the time. Don't turn it off when you leave your apartment. If you do, when you return home it may take a couple of hours for your heating and cooling system to condition your home to the temperature you like. Remember, your home is benefitting from a large renewable energy system which will help to lower your electricity bills.

DID YOU KNOW?

Heating and cooling our homes accounts for almost **HALF** of the energy use in the average American home. – US Department of Energy (DOE) 2014

ENERGY HEATING SYSTEM TIPS

Please **DO NOT** use portable heaters as they are a fire hazard and are very energy intensive. Instead, dress warmly and let sunlight into your home. Close doors to rooms that are not being used to help contain the heat. **Keep all heating vents clear of obstruction to ensure heat can enter the room.**

KEEP WINDOWS CLOSED
Heating your home while allowing cool air in and hot air out wastes energy.

SEAL LEAKS
If you think you have an air leak, contact management to get it fixed. This improves energy and keeps you comfortable.

OPEN CURTAINS
Allowing the sun to warm your home reduces the demand on your heating (and lighting) system.

USE BLANKETS AND DRESS WARMLY
Using blankets and wearing layers cuts down on the need to turn up the thermostat.

ENERGY

COOLING SYSTEM GUIDELINES & TIPS

Your home is served by a packaged terminal air conditioner (PTAC). They provide energy-efficient heating and cooling. Both the heating and cooling of your home is maintained by the same thermostat.

Cooling your home uses a lot of energy in the summer months. Ensure your comfort and efficiency by following these tips:

CLOSE WINDOWS WHEN THE AC IS ON
Letting cold air out and hot air in wastes energy.

CLOSE CURTAINS
In the summer months, stay cooler during the day by keeping the sun from heating your home.

SET THE AC TEMP AT 78 DEGREES OR MEDIUM
During cool nights, open windows and turn the AC off or turn the thermostat up a few degrees.

USE A FAN
Instead of (or in addition to) turning on the AC, use a ceiling, window, or portable fan to keep air cool.

DID YOU KNOW?

The amount of energy consumed in the U.S. every year to power our air conditioners is about the same as the amount of energy consumed by the entire continent of Africa.
– Stan Cox, Yale University 2012

WATER SMART SAVING WATER IN YOUR HOME

Water is one of the Earth's **most valuable resources**, yet many of us don't take the time to think about where our water comes from. In fact, every year the number of states in drought grows and fresh water is becoming scarce. **Less than 1% of the water on Earth can be used for drinking and only much less is readily available.**

For these reasons, your home has been designed with high-efficiency water fixtures to help conserve this precious resource.

	AVERAGE FIXTURE	YOUR FIXTURE
Showerhead	2.5 gallons/min	1.75 gallons/min
Bathroom Faucet	2.2 gallons/min	0.5 gallons/min
Kitchen Sink	2.2 gallons/min	1.5 gallons/min
Toilet	1.6 gallons/flush	1.0 gallons/flush
Dishwasher	10 gallons/cycle	5.8 gallons or less
Washing Machine	23 gallons/wash	15 gallons or less

YOU SAVE

2,975 gallons

EVERY YEAR!

You may notice that your kitchen and bathroom sinks have a lower flow. This helps to greatly reduce excess water being wasted and to save on utility bills.

The average person uses **80-100 gallons** of water each day! That's over **31,000 gallons** per year! – US Geological Survey, 2015

WATER SMART

WATER CONSERVATION TIPS

It takes lots of energy to pump, treat, and heat water so saving water reduces greenhouse gas emissions and can protect this necessary resource. Saving water around the home can be simple by following these steps:

TURN OFF WATER WHEN NOT IN USE

Turn off water while you brush your teeth, shave your face, and applying soap to your hands.

WASH FULL LOADS

A full load of laundry uses much less water than two half loads and save electricity.

DO NOT FLUSH GARBAGE

Never use the toilet as a wastebasket. Save water and prevent blockages by disposing of waste properly.

REFRIGERATE DRINKING WATER

Don't run water to wait for it to get cold. Fill up a labeled bottle and put it in the fridge.

RECYCLE WATER AROUND THE HOUSE

For example, you can collect water used to wash fruits and veggies for watering house plants.

TAKE SHORTER SHOWERS AND FEWER BATHS

Showers typically use less water. Shortening your shower even by 1 minute can save over 500 gallons per year.

FIX DRIPPING FAUCETS AND RUNNING TOILETS

If you notice an issue with your plumbing, notify management right away.

CLEANING

RESOURCES

WASTE

RECYCLING AND WASTE MANAGEMENT

Waste that we throw away, chemicals that we pour down drains, and items that we do not recycle all harm our planet. Waste is a major factor in the pollution of our soils, air, bodies of water, and our forests.

Day Creek Senior Villas works with local waste haulers to provide you with an easy means of reducing the amount of waste you put in the landfill. All trash should be disposed of in the dumpster/trash room/trash next to the parking area. There are separate bins for recycling and trash available. Please dispose of your waste in the proper location.

RECYCLE THESE ITEMS

- Paper
- Plastics (marked with #1 - #7)
- Aluminum and tin
- Cardboard and paperboard
- Glass
- Phone books
- Steel and empty aerosol cans

**Be sure to
rinse out
bottles and
containers to
avoid odors
and pests.**

DID YOU KNOW?

The average American discards **4.4 pounds of garbage** every day. Most of this garbage goes into landfills, where it's compacted and buried. - EPA, 2014

Recycling just one glass jar **saves enough energy to power a CFL for 20 hours.** Recycling a stack of paper just three feet high **saves one tree.**

- Recycle Across America, 2014

WASTE

ADDITIONAL WAYS TO REDUCE WASTE

Think of other ways to reduce waste such as:

- Donating lightly used items to charities that re-use or re-sell used items
- Giving books to libraries or schools
- Sell used items on Internet to both recover money and find new uses for them

The City of Rancho Cucamonga has means of recycling electronics to reduce e-waste (TVs, microwaves, chargers, etc.) from going to landfills. For more info, visit:

<https://www.cityofrc.us/healthy-rc/environmental-programs/household-hazardous-waste>

USE A REUSABLE BOTTLE

Each year, billions of plastic water bottles are thrown away.

AVOID USING DISPOSABLES

Avoid using Styrofoam cups, paper plates, plastic utensils, and single-use cups.

USE REUSABLE SHOPPING BAGS

Take your own bag for groceries to help cut down on single-use plastic bags.

END JUNK MAIL

Remove yourself from mailing lists. For more information, visit:

www.catalogchoice.org

REUSE/RECYCLE

Think twice before putting something in the trash. Decide if there is a better way to dispose of or reuse the item.

WASTE

RECOGNIZE HAZARDOUS WASTE

Be smart about hazardous waste. It can threaten human health and contaminate the air, water, and soil. It is important to dispose of these items properly. Contact management for assistance with disposal of these products.

For collection / drop-off information, please visit:

<https://www.cityofrc.us/healthy-rc/environmental-programs/household-hazardous-waste>

GREEN SPACE CONTRIBUTUE TO GREEN SPACE

Green space is essential to the health of our planet. Plants help clean the air we breathe, absorb greenhouse gases, provide habitat for wildlife, maintain diversity, and reduce the hot temperatures in the summer.

You can help maintain our community's green space by adhering to the following guidelines:

- 1. PICK UP LITTER** Litter attracts pests, is harmful to wildlife, and may lead to more crime. Help keep our community space beautiful and clean.
- 2. LEAVE THE PLANTS IN PLACE** Do not pick or trample plants and flowers. The landscaping is intended for all to enjoy and leaving them alone keeps them healthy and thriving.
- 3. PICK UP DOG WASTE** Keep green space enjoyable for everyone and dispose of pet waste properly.
- 4. KEEP THE COMMUNITY SPACES FREE OF PERSONAL ITEMS** The non-personal community spaces both inside and outside are for use by all residents. Contribute to their maintenance and upkeep by keeping personal items in your own homes.
- 5. GET INVOLVED** Help with local cleanup projects, urban gardening, spreading the word, and simply spending time outside.

DID YOU KNOW?

Researchers found that residents whose apartments were near green spaces **reported fewer aggressive conflicts**, including domestic violence, than those who had no views of green space. They also **procrastinated less** on major goals, like finding a job or new home and were less likely to think their problems were unsolvable. — Kuo, Journal of Environment and Behavior, 2011

GREEN CLEANING

THE RIGHT PRODUCTS FOR YOU

How can you tell if a product is sustainable and healthy?

“Green” cleaning products have specific ingredients that help to create a healthier indoor environment and reduce outdoor smog by avoiding volatile organic compounds (VOCs).

SELECT PRODUCTS LABELED

- Unscented
- Concentrated
- Biodegradable
- Non-toxic
- Low or no-VOC
- Phosphate Free
- GreenSeal Certified
- Design for the Environment

AVOID PRODUCTS LABELED

- Anti-bacterial
- Anti-microbial
- Highly flammable or combustible
- Danger
- Poison
- Corrosive
- Caution
- Never use chlorine bleach or ammonia

The way you clean also matters. Follow these best practices:

- Sweep and mop the floors of your apartment at least once a week
- Vacuum the carpet regularly
- Wash dirty dishes and kitchen surfaces daily
- Wipe up spills immediately
- Clean discolored surfaces or cracked grout with baking soda or borax. If discoloration persists or gets worse, contact Management
- Open windows to let fresh air in when the heat and A/C are off
- Clean your stove's range hood and grease filter
- Avoid using bristly cleaning brushes and abrasive products
- Regularly replace sponges and cleaning rags
- Don't mix cleaning products – you may cause unexpected reactions
- Dispose of chemical products properly

DO IT YOURSELF

EASY RECIPES FOR HOUSEHOLD CLEANERS

BASIC WINDOW CLEANER

¼ Cup white vinegar
Water

Pour white vinegar in a spray bottle and fill to top with water. Spray on surface and wipe with clean sheets of newspaper.

ALL-PURPOSE SPRAY

2 Tbsp. white vinegar
½ Tsp. liquid dish soap
1 Tbsp. baking soda
2 Cups warm water

Combine vinegar and soap in spray bottle. Add baking soda and wait until foaming stops. Add water and shake to mix. Spray and let sit before wiping with a clean rag.

PEPPERMINT FLOOR CLEANER

¼ Cup Murphy's Oil Soap
1 Cup white vinegar or lemon juice
1 Cup very strong peppermint tea

Combine ingredients in a bucket of warm water and mix until sudsy.

Scrub floor with mop or rag. Follow with a clean water rinse.

TOILET BOWL CLEANER

Sprinkle baking soda inside bowl
Squeeze in a few drops of
Murphy's Oil Soap or Castile Soap

Scrub toilet with a bowl brush and finish outside surfaces with a rag sprinkled with baking soda.

Rinse well with clean water.

Cut out the above green cleaning recipes and post on your refrigerator!

PEST MANAGEMENT PREVENTION TIPS

Pests can carry disease. If you find bugs, ants, rodents, or other pests in your apartment, report it to on-site property manager immediately. Pests are often not a sign of “dirtiness” and are something that can happen to any of us.

If you do find pests, please **use non-toxic pesticide products** and avoid those products that are dangerous to your health, such as sprays or moth balls. Most pesticides are poisons, and they are often **poisonous to humans**, as well as to pests. Studies have linked some pesticides to cancer, birth defects, neurological disorders, and immune system disorders, as well as allergies.

Non-toxic solutions (such as sprinkling borax), baits and traps should be used prior to more aggressive means.

The best strategy is **to keep pests from coming into your apartment in the first place.**

- **Clean** up food and spills right away
- **Clean** the kitchen regularly
- **Sweep** the floors regularly
- **Rise** bottles before recycling
- **Take out** garbage and recycling regularly
- **Minimize** clutter and paper piles

Carefully inspect all used furniture before you buy. **Most bed bugs are carried into the home on used furniture.** If you have bed bugs contact Management **ASAP.**

HEALTH HAZARDS MITIGATION AND PREVENTION

- Radon** This property is in Radon Zone 2. If required, this building has been tested for radon and there is a mitigation system in place if and when the gas is at a harmful level. Radon is a natural gas in the ground that rises up and can be deadly.
- Lead** Lead is sometimes present in older buildings. Day Creek Senior Villas is a brand-new building, so there is no lead in any paints, pipes, or any other material.
- Asbestos** This is a brand-new building and asbestos is not present in any building material. In fact, asbestos was outlawed as a building material in 1978.
- Mold** During the construction of the building, special care was taken to install anti-microbial surfaces and ensure proper water drainage to limit mold and moisture issues. Be sure to check for and report mold, musty smells, or leaks as soon as possible and use your bathroom and kitchen exhaust fans as designed. Moisture damage can quickly lead to asthma and air quality issues as well as damage to the property.
- Fire** Smoke detectors have been installed to provide early warning against deadly smoke. Do not dismantle your alarm. If it starts beeping, the batteries need to be replaced. Do so as soon as possible.
- Carbon Monoxide** Monitors have been installed to prevent carbon monoxide (CO) poisoning. CO is a silent killer. It has no smell, taste, or color. Do not dismantle or unplug your alarm.

At least two times per year **test your smoke detector**. This is done by pushing the button in the center. Notify management immediately if the alarm isn't functioning.

HEALTH HAZARDS NON-TOXIC FINISHES

All the paints, coatings, adhesives and sealants used in the building have low/no volatile organic compounds (VOC). In addition, all composite wood products (cabinets, cupboards, countertops, etc.) have no added urea formaldehyde. VOC and formaldehyde are carcinogens that are often found in building finishes.

If needing to use one of these products (sealing furniture, painting, etc.), please select no/low-VOCs and urea-/formaldehyde-free products. The following are good guidelines:

	PAINT TYPE	MAXIMUM VOC LIMIT
	Primers and sealers	100 g/L
	Coatings, flats and non-flats	50 g/L
	Rust preventative coatings	100g/L
	Clear wood finishes	275 g/L

MAINTENANCE

& SAFETY

EMERGENCY PLAN

- Earthquake** Stay calm and keep away from overhead fixtures, windows, filing cabinets, and electrical power.
- Assist people with disabilities in finding a safe place.
 - Evacuate as instructed by a designated official or management.

Local Health Emergencies Government authorities may issue a variety of warnings and recommendations in the event of a wider health threat. Please follow all recommendations such as staying indoors, social distancing, wearing of face coverings, and avoidance of certain locations or practices. Detailed information will be provided by management. If you have questions about any warnings, or if you have individual needs during such an event, please contact your community manager.

Evacuations Should there be a government-issued evacuation order due to events such as wildfire or flooding, management will provide additional information on compliance of the government evacuation order. If you need help with evacuations, please contact your community manager.

SITE MAINTENANCE

Personal Items

In order to keep pests away and maintain the beauty of the neighborhood, please keep the sidewalks and public common areas clear of any bicycles, motorcycles, grills, toys, trash, cigarettes, or other personal items.

Patios/ Decks

Your apartment home may or may not have patios. When cleaning your patio, please sweep it off with a broom rather than using a hose or water. This decreases cracking of the cement and helps to conserve water. Please do not use your patios/decks as storage area.

Beautifying

To maintain a nice exterior appearance throughout the community, all window coverings must be approved or furnished by management. No signs, signals, unusual illumination, or advertisements are allowed to be displayed on windows, doors, or any other part of the building. If you wish to hang personal items near your entrance, please contact management for approval first.

Landscape

The plants on this property are either local plants native to the climate and region or plants that survive well in our climate with little need for maintenance. This helps conserve water, provides needed habitat for local wildlife, and limits weed growth. If you walk your dogs, please pick up their feces and dispose properly.

Irrigation

The irrigation or lawn watering system was designed to limit water use while ensuring we maintain healthy plants. The plants receive just the amount of water they need through drip irrigation in conjunction with a rain sensor. If you notice an issue with the irrigation system, please let management know.

Management 909.646.4544

EMERGENCY MAINTENANCE

If you encounter any of these situations, contact management immediately:

- Inoperative smoke alarm or CO detector (fail the test even after changing the batteries)
- Kitchen sink clogged up (after plunging failed; do not use chemicals)
- Clogged up toilet (after plunging failed; do not use chemicals)
- Power outage not by utilities (check with a few neighbors first, then check RCMU)
- Overflowing or broken toilet causing leaks
- Water leak
- No A/C or Heat
- No hot water
- Gas leak or pilot light out
- Wall-mounted sink loose
- Inoperative stove
- Inoperative refrigerator/freezer
- Broken windows
- Broken door locks
- Banister or railings loose or broken
