

RESIDENTS, WE HEARD YOU!

Centerspace has created a Green Cleaning Purchasing Guide to reduce our collective environmental footprint.

GREEN CLEANING PRODUCTS

Green cleaning products are designed to limit the environmental impact of cleaning while promoting indoor air quality and providing the same cleanliness quality as standard products. These are products that are pet-friendly, do not contain toxic chemicals, and have limited amounts of dyes and fragrances.

ECO-FRIENDLY PRACTICES

We'll use products like Simple Green and microfiber towels to keep the common areas green clean, but we'd LOVE it if you used green cleaning products in your home. Did you know that if just 30% of products in use are green cleaning products, you'll improve your health and the environment?

When choosing Green Cleaning products in your home, look for these logos:

MAKE A GREENER CHOICE

You can use this product guide for purchasing specific Green Cleaning products. Centerspace team members have loved Blueland and Simple Green products!

BLUELAND BATHROOM CLEANER

Tablet-based system that comes with a "forever bottle". Users report that this product works best as a maintenance or in-between cleaner.

Blueland's website offers refill tablets in bulk or an auto-ship subscription can save you up to 20% on recurring order.

BLUELAND DISHWASHER TABLETS

Tablet-based system without a harmful microplastic casing. Made cruelty free with USDA certified ingredients. Users report that this product works well to deliver streak free glassware.

Blueland's website offers refill tablets in bulk or an auto-ship subscription can save you up to 20% on recurring order.

BLUELAND LAUNDRY TABLETS

Tablet-based system without a harmful microplastic casing. Made cruelty free with USDA certified ingredients. Users report that this product works well in both hot and cold water.

Blueland's website offers refill tablets in bulk or an auto-ship subscription can save you up to 20% on recurring order.

SIMPLE GREEN ALL PURPOSE CLEANER (CONCENTRATE)

Concentrated cleaner you can dilute with water for all purpose cleaning. For use as a floor cleaner, bathroom cleaner, kitchen cleaner and more. Users report that you can use it full-strength for heavy messes or easily dilute it with water for daily cleaning.

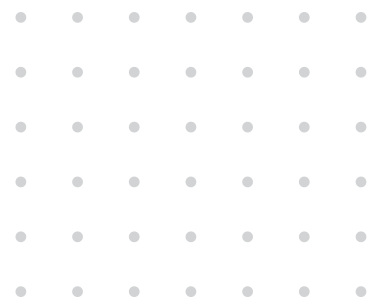

Simple Green can be found at Home Depot and Lowes, with the concentrate option designed to make up to two gallons of cleaning solution for cost effectiveness.

SIMPLE GREEN PRO SHOWER CLEANER (CONCENTRATE)

Concentrated cleaner you can dilute with water for deep bathroom cleaning, effectively removing soap scum and mineral deposits without harming sensitive surfaces. Because the product is slightly acidic, users recommend wearing cleaning gloves and avoiding the eyes to prevent dryness and irritation.

Simple Green can be found at Home Depot and Lowes, with the concentrate option designed to make up to two gallons of cleaning solution for cost effectiveness.

To upgrade your home beyond using green cleaning products, check out our product requirements below:

- 1.** Your apartment is already equipped with a low-flow shower head and we don't recommend changing it but if you decide to replace the standard shower head with a personal option (such as a cosmetic or filtered shower head), we simply require that the new unit be a low-flow model with a maximum flow rate of 2.0 GPM (Gallons Per Minute). This helps us meet our water efficiency goals without compromising your shower experience. Please check the GPM specifications on the packaging before purchasing your new unit.
- 2.** If a light bulb burns out, please replace it with an LED bulb. LED bulbs can cut electricity costs by 75%, which reduces your electric bill, and lasts longer than traditional bulbs.
- 3.** When shopping for household appliances choose ENERGY STAR rated products as a safer option that also reduces your electric bill.
