

WINTER WEATHER | *Be Prepared*

BE PREPARED FOR WINTER WEATHER:

Turn your ceiling fans on low in reverse (clockwise when looking up) to circulate warm air.

Inspect fireplaces, and chimneys before using, and have them cleaned if needed.

Bring in potted plants from outdoors.

Keep the cabinet under the kitchen sink open so warm air can flow around the pipes.

Keep apartment heated to at least 62° to prevent pipe freezing.

Keep an emergency kit in your apartment and vehicle (candles, bottled water, flashlight, batteries, blankets).

Ice melt buckets are provided at every entrance for resident use during snow/icy conditions.

Take extra caution when driving in the parking lot and when walking to/from your vehicle!
